### **Penelope The Pig Nose Fairy Tale**

The movie website for the new movie Penelope is bright, fresh and inviting. The graphics are fabulous!...but, not too many reasons to visit the site. The best part of the website is that it has a link to the soundtrack of the Penelope movie. Clicking on the soundtrack link will take you to the Penelope myspace soundtrack page (not to be confused with the Penelope myspace page itself), where you can hear all the songs from the movie! There are also some great downloads to pick up, including some great Penelope AIM / Buddy Icons and some desktop wallpapers. In the gallery section, check out the movie stills of "The Pig" Penelope, the parents, the doctors, the love interest and more! For those of you who have never heard about the film, watch the trailer - it looks like it's going to be a good movie - it's about a girl named Penelope (played by Christina Ricci) who was born with the nose of a pig! It's about how Penelope comes to terms with how and what she looks like - it's a modern day fairy tale with a Prince Charming and everything! Reese Witherspoon acts in the film and is also a producing partner. Other cast members include James McAvoy, Catherine O'Hara, Richard E. Grant, Peter Dinklage, and Simon Woods. Overall review: not too many reasons to visit the Penelope website, although it looks like there's tons of reasons to see the movie!
