Midnight Meat Train Boring Website

Sometimes the movie website of a new movie may not be worth visiting, and here at Best Movie Websites, we need to tell you where NOT to go so you don't waste your time! Well, the movie website for the thriller movie *Midnight Meat Train* is hardly worth the webspace it takes up. There are no downloads, no games... only a trailer and a "Coming Soon" link. That's it! For a movie that stars a big name like Brooke Shields, that's something of a disappointment. The movie, about a struggling photographer who crosses paths with a serial killer may or may not be good...you'll never know through the website though! Don't waste your time on the site! Possibly the movie will be better.

Best Movie Website!
