How She Move on Myspace

Myspace page as the only website available for a movie? Yep, that's what the How She Move movie did. Results? Lackluster.....but at least they're trying to get people involved! The Myspace page has the usual movie trailer, film synopses (a coming of age tale about a young woman step dancing), and movie stills. You'll also find some downloads - How She Desktop and AIM / Buddy Icons (there are actually 6 icons to choose from! pretty good selection). Different from other sites, you'll find some behind the scenes links, and videos of How She Moves events from Atlanta, Washington DC, and Chicago. The best part of the site has to be the free ringtone. You just text "HSM" to 33287 to get your free ringtone (standard messaging rates apply). You won't be here long, so on your way out, read some of the messages from the movie's Myspace fans!

Best Movie Website!
