Vantage Point Secret Service Memory Game

Visit the new Vantage Point Movie website and your cursor turns into a surveillance camera to learn about different characters in the movie including - Agent Taylor (a Secret Service agent on his first assignment played by Matthew Fox), Rex (a journalist who will do anything to get the story, played by Sigourney Weaver), Veronica, a female paramedic undercover Secret Service agent), Suarez (a alleged member of a terrorist group with a criminal history), and President Ashton. The Cast and Crew section of the website is still pending, but you can watch a trailer and download some cool Vantage Point AIM / Buddy Icons, check out the movie image gallery, and get a Vantage Point movie wallpaper. The best part of the movie website is the "Games" section - gamers will find 3 great games - Instant Recall (the best game here and a pretty cool memory game where you are shown a face and then must then create the face that you just saw), Neutralize the Threat (you play Secret Service Agent Barnes and must identify the potential threat based on communications given to you), and Split Second (you play a secret service agent who must protect the president by shooting the enemy without harming bystanders...just shoot in the windows of the building).

Best Movie Website!

That's a pretty sweet thing that it turns into a camera vs cursor..I really want to see this movie as it is original...good plot twist > explosions.
